

CUWS-Parkland Classes, Summer 2017

Class Title: Using Power Tools for Woodworking- Session 2

Description: This class is designed to help beginner to intermediate woodworkers learn to efficiently utilize power tools and woodworking machinery with a strong emphasis on safety. Students will learn basic setup and safe operating principals for the table saw, miter saw, bandsaw, planer, jointer, router, router table, drill press, mortiser, and various power sanders. This class provides very good preparation for the Woodworking Safety Certification Class, successful completion of which is a prerequisite to signing up for our Independent Skill Development program.
